DETAILED ACTION

Election/Restrictions

1. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 14-16 and 18-19, directed to the species of the heat resistant polymer layer and conductive film are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: the instant claims are allowable as applicants have provided a certified translation of the priority document from which the present application claims priority rights. Accordingly, the JP'151 publication is not longer available as prior art against the claims of the present application. In addition, the present application is deemed to be directed to an unobvious modification over the prior art of record. The unobvious modification comprises, in combination, the bipolar current collector separator composed of the specific metal plate, the specific corrosion resistant layer disposed thereon, and having the specific flow channels as recited in independent claim 1. Moreover, it is noted that the transitional phrase "composed of" has been interpreted in the same manner as either "consisting of" or "consisting essentially of", that is, excluding any element, or ingredient not specified in the claim, or limiting the scope of the claim to the specified materials and those that do not materially affect the basic and novel characteristic of the claimed invention (Refer to MPEP

Art Unit: 1745

2111.03 [R-2] Transitional Phrases: Other Transitional Phrases). Likewise, the transitional phrase "having" has been interpreted as closed claim language in light of the specification (Refer to MPEP 2111.03 [R-2] Transitional Phrases: Other Transitional Phrases).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
